#### Ingestion

Rinse mouth, drink 1-2 glasses of water, do not induce vomiting, consult a doctor.

## Indication of immediate medical attention and special treatment needed:

See section: Description of first aid measures

Small amounts of liquid aspirated into the respiratory system during ingestion or from vomiting may cause bronchopneumonia or pulmonary oedema.

Do not induce vomiting.

Seek medical attention from a specialist.

## Section 5. Fire fighting measures

## Suitable extinguishing media:

# LOCTITE SF 7070 ODC-FREE CLEANING & DESGREASING known as ODC Free Cleanr Degreaser 425gm

Do not expose to direct heat.

#### Special protection equipment and precautions for firefighters:

Wear self-contained breathing apparatus.

In case of fire, keep containers cool with water spray.

## Hazardous combustion products:

Oxides of carbon, oxides of nitrogen, irritating organic vapors.

## Section 6. Accidental release measures

## Personal precautions:

Avoid skin and eye contact.

Remove sources of ignition.

Ensure adequate ventilation.

Wear protective equipment.

See advice in section 8

#### **Environmental precautions:**

Do not empty into drains / surface water / ground water.

#### Clean-up methods:

For small spills wipe up with paper towel and place in container for disposal.

For large spills absorb onto inert absorbent material and place in sealed container for disposal.

Store in a partly filled, closed container until disposal.

Dispose of contaminated material as waste according to Section 13.

## Section 8. Exposure controls / personal protection

#### Components with specific control parameters for workplace:

#### Respiratory protection:

Ensure adequate ventilation.

An approved mask or respirator fitted with an organic vapour cartridge should be worn if the product is used in a poorly ventilated area

Filter type: A (EN 14387)

## Hand protection:

Chemical-resistant protective gloves (EN 374).

Suitable materials for short-term contact or splashes (recommended: at least protection index 2, corresponding to > 30 minutes permeation time as per EN 374):

nitrile rubber (NBR; >= 0.4 mm thickness)

Suitable materials for longer, direct contact (recommended: protection index 6, corresponding to > 480 minutes permeation time as per EN 374):

nitrile rubber (NBR; >= 0.4 mm thickness)

This information is based on literature references and on information provided by glove manufacturers, or is derived by analogy with similar substances. Please note that in practice the working life of chemical-resistant protective gloves may be considerably shorter than the permeation time determined in accordance with EN 374 as a result of the many influencing factors (e.g. temperature). If signs of wear and tear are noticed then the gloves should be replaced.

#### **Eye protection:**

Safety glasses with sideshields or chemical safety goggles should be worn if there is a risk of splashing. Protective eye equipment should conform to EN166.

## **Body protection:**

Wear suitable protective clothing.

Protective clothing should conform to EN 14605 for liquid splashes or to EN 13982 for dusts.

#### **Engineering controls:**

Provide local and general exhaust ventilation to effectively remove and prevent buildup of any vapors or mists generated from the handling of this product.

#### Hygienic measures:

Wash hands before work breaks and after finishing work.

Do not eat, drink or smoke while working.

Take off contaminated clothing and wash before reuse.
